

next generation web hosting

With so many Web Hosting Companies on the Internet, why should you choose us?

Multiple Domain Hosting

With other companies you have to buy a separate account for each of your domains. Even companies that brag about giving you multiple domains almost always just give you a space for an additional domain, and not mail, database or FTP capabilities. With nm-hosting.co.uk, anything you can do on a primary domain, you can do on every one of your domains. In fact, there's no such thing as primary or secondary domain in your nm-hosting.co.uk account. Every domain is equal and has full range of services.

Even our Basic Plan comes with Multiple Domain Hosting!

Distributed Infrastructure

Unlike some other companies, with nm-hosting.co.uk, each service is located on its own dedicated servers, and does not interfere with operation of other services. If your web site were to go down, it would not affect your email capability!

Advanced Control Panel

Unlike other web hosts that include no, or a very basic, control panel, all nm-hosting.co.uk accounts include access to the advanced control panel that allows you to easily manage everything from additional FTP accounts to DNS settings.

The control panel interface that Helm offers has been specifically designed for ease of use and adaptability. What you have are powerful features, online help and very easy to use functions. You can control every aspect of your hosting system securely from any internet connected PC anywhere in the world!

Fantastic Support

Our staff is committed to making your web hosting experience with nm-hosting.co.uk as seamless and enjoyable as possible. If you have any questions or queries that are not answered in our Support section, simply write us an email at support@nm-hosting.co.uk and someone will address your issue right away.

AWStats

All accounts include AWstats. AWStats is a short for Advanced Web Statistics. It's a powerful tool that generates advanced website statistics graphically.

Value-added Services

Once you signup for an account with us, you won't have to wonder where to go for additional services. If you need a professionally designed web site, just fill out our sister company's (nm-design.co.uk) Web Design Quotation Form and someone will contact you about it right away. We are in a process of carefully selecting strategic partners that will allow us to provide even more great services to you right from this site.

Pre-installed Software

While most companies, even expensive ones, give you a basic account with nothing to help you to get started, nm-hosting.co.uk accounts come loaded with over 35 commercial ASP components that will make your web-hosting experience so much more enjoyable. Pretty much everything a small business will need is at your fingertips and easily manageable from your control panel.

hosting plans and additional option prices
